

Department of Natural Resources

Excavation of Accumulated Sediment in Altered Public Watercourse

General Permit Notification and Verification Form

General Permit No. 2011-0171 requires that the DNR Area Hydrologist approve the work proposed before this permit is valid. Please fill in the items listed below and send this form to the Area Hydrologist. This notification form is only for work authorized by General Permit No. 2011-0171.

Note: Work may not commence until this form is signed by the Area Hydrologist.

Applicant /Landowner:		Contact Person or Agent:	
Landowner Address:	City:	Zip code:	
Phone:	Cell:		
Fax:	e-mail:		
Agent Address:	City:	Zip code:	
Phone:	Cell:		
Fax:	e-mail:		
Public Water Course:			
Project Description: (channel length in feet x depth of sediment excavation x width of finished channel bottom):			
Requirement: Aerial photo highlighting area of watercourse to be completed must be attached.			
Name of Watercourse:			
Project Location: County: _____ Section# _____, Township # _____, Range# _____.			
UTM Location : N _____ E _____ (DNR will complete)			
Signature of Applicant (By signing, I certify that the information submitted is true and correct to the best of my knowledge.)			
Signature of Agent			
By Signing this notification form, I verify that I control the land in question and understand that I will be required to install a 50 foot buffer per Condition #12.			

****Applicant/Agent - Send this signed notification form and related drawings and plans to the appropriate DNR Area Hydrologist for verification at least 15 days prior to proposed start of work.**

Verification – To be completed by the Area Hydrologist.	Permit Expires:
DNR Ecological & Waters Resources has reviewed the above information and has determined that the above described work meets the conditions set forth in General Permit No. 2011-0171 for the excavation 6-18 inches (not to exceed an average of 12 inches) of accumulated sediment from the bed of channel, and is authorized by the General Permit. I hereby verify that the above described project qualifies under General Permit No. 2010-0171.	
Area Hydrologist Signature:	Date:

Note to applicant: Contractor & Permittee shall read the enclosed copy of the General Permit including its conditions. If you have any questions, the Area Hydrologist needs to be contacted before excavation work is started.

This box is checked if there are additional conditions specific to this project or areas, they are listed on reverse page.
